Abigail follows you on the common goal of stopping the Alien cloning and experiments, she helps you in the fights and with the puzzles. She possesses an encrusted Divenia Gem that makes her capable of controlling Antimatter and Dark Matter.

Help Us Save the World!

The Government has Secretly Cloned Aliens! But they weren't able to control them and the Human Race is, once again, at Risk.

A Meteor crashed at Antarctica on the late 90's, it contained an element new to the humans, they called it Divenia, it has the power of controlling Antimatter so it's Energy applications were wide.

The government hired a Private Contractor to clone Aliens and they succeeded, but they became powerful and aggressive, so they lost control, they called them AOX then we call them Alfas. The legend says only the first attempt was successful to control and it helps the contractor in their very own agenda.
